Sara B.

Working for a safer, more humane world - both inside & out.
London, United Kingdom

Summary

Sara Bronfman has always genuinely been concerned for the welfare of others. Growing up in different parts of the world brought with it unique lessons in humanity: exposure to a number of cultures and contexts would help Sara relate with people beyond race, culture, religion or socioeconomic background. Through the years, critical formative events led to her determination to find a way to make the world a safer, more humane place—specifically, to evolve our selves beyond war, violence and injustice. This conviction fuels her path and has brought her to be involved in the business, social and humanitarian endeavours she is today.

Experience

Rainbow Cultural Garden UK Ltd
CEO

January 2015 - Present

Rainbow Cultural Garden is a multicultural, multilingual early educational programme which nurtures and promotes the linguistic, emotional, physical and problem-solving potential during a child's most critical development stages.

World Ethical Foundations Consortium
Co-Founder and Inaugural Event Chair

August 2008 - Present

Bringing compassion through the mutual efforts of different cultures.

Ethical Humanitarian Foundation
Co-Founder

January 2007 - Present

It is our mission to support endeavors that help us to embrace our humanity, build our ethics, and move us towards a more noble civilization.

Historically, the discovery of scientific thinking and logic created improvements in civilization. The enticement of these conveniences caused many influential people to forget the source of this thinking: Humanity.

We believe transforming this thinking throughout the different branches of society; education, business, science and government is vital for the future of our children and future generations.

We believe it is essential for our decision processes to evolve to a humanity first foundation.

It is our hope the effects of such a shift in thinking and process will set a new course for humanity; steering us towards a more noble civilization.

Our Evolution LLC

President

January 2005 - Present

US/UK

The first step in the evolution of ethics is a sense of solidarity with other human beings.

- Albert Schweitzer

At Our Evolution we are committed to bettering our world, one person at a time. We promote the well being of individuals, families and communities by imparting the tools of Rational Inquiry™ and the programs of Executive Success Programs™, Jness™ and Rainbow Cultural Garden™ to our clients.

Executive Success Programs™

Professional Coach

2003 - Present

Albany & New York, NY & London, UK

As a Professional Coach working with the incredible tools of Executive Success Programs™ I am committed to helping people define what is vitally important to them and living their lives according to their highest values and principles; As a result people achieve their own personal definition of success, and live with more love and joy! This process not only enhances their experience of life, but also the experience of all those around them. This is my passion and it is truly an honour and privilege to do something I love so much.
